Chapter 2

Data Structure Index

2.1 Data Structures

Here are the data structures with brief descriptions:

EDatabase	Helper class encapsulating the PDO object	7
LAxis	Class that contains an axis	8
LChart	Class that is a container for charts	10
LUser	This class is a container for a user	12
LUserDB	Class that makes query on DB for users	13

Chapter 3

File Index

3.1 File List

Here is a list of all documented files with brief descriptions:

public/ index.php	
Main page	17
public/res/php/ all.inc.php	
File taht include all the files needed	17
public/res/php/ LAxis.php	
Class LAxis	19
public/res/php/ LChart.php	
Class LChart	19
public/res/php/ LUser.php	
Class LUser	20
public/res/php/database/ database.inc.php	
Class EDatabase	18
public/res/php/database/ LUserDB.php	
Class LUserDB	18

Chapter 4

Data Structure Documentation

4.1 EDatabase Class Reference

Helper class encapsulating the PDO object.

Static Public Member Functions

- static [getInstance](#) ()
Returns DB instance or create initial connection.

4.1.1 Detailed Description

Helper class encapsulating the PDO object.

Remarks

Mettre le bon chemin d'accès à votre fichier contenant les constantes

Author

dominique.aigroz@kadeo.net

Remarks

4.1.2 Member Function Documentation

4.1.2.1 getInstance()

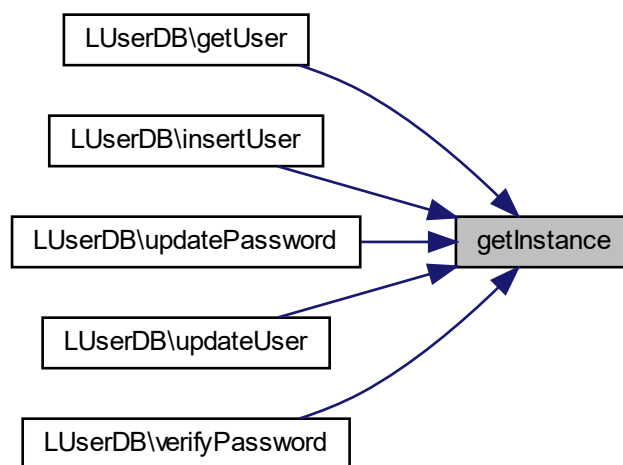

```
static getInstance ( ) [static]
```

Returns DB instance or create initial connection.

Returns

\$objInstance;

Here is the caller graph for this function:

The documentation for this class was generated from the following file:

- [public/res/php/database/database.inc.php](#)

4.2 LAxis Class Reference

Class that contains an axis.

Public Member Functions

- [__construct](#) (\$InName="", \$InType="", \$InData=array())

Data Fields

- [\\$Name](#)
- [\\$Type](#)

4.2.1 Detailed Description

Class that contains an axis.

4.2.2 Constructor & Destructor Documentation

4.2.2.1 __construct()

```
__construct (
    $InName = "",
    $InType = "",
    $InData = array() )
```

Constructor that create an object of type [LAxis](#)

Parameters

string	<i>\$InName</i>	name of the chart
string	<i>\$InType</i>	type of the axis
array	<i>\$InData</i>	array of the datas

4.2.3 Field Documentation

4.2.3.1 \$Name

\$Name

Name of the axis

4.2.3.2 \$Type

\$Type

Type of the axis

The documentation for this class was generated from the following file:

- [public/res/php/LAxis.php](#)

4.3 LChart Class Reference

Class that is a container for charts.

Public Member Functions

- [__construct](#) (\$InId=0, \$InName="", \$InNameAxisX="", \$InTypeAxisX="", \$InNameAxisY="", \$InTypeAxisY="", \$InChartType="")

Data Fields

- const [TYPE_CHART](#)
- [\\$Id](#)
- [\\$Name](#)
- [\\$AxisX](#)
- [\\$AxisY](#)
- [\\$InChartType](#)

4.3.1 Detailed Description

Class that is a container for charts.

4.3.2 Constructor & Destructor Documentation

4.3.2.1 __construct()

```
__construct (
    $InId = 0,
    $InName = "",
    $InNameAxisX = "",
    $InTypeAxisX = "",
    $InNameAxisY = "",
    $InTypeAxisY = "",
    $InChartType = "" )
```

Create an object of type [LChart](#)

Parameters

integer	<i>\$InId</i>	id of the chart
string	<i>\$InName</i>	name of the chart
string	<i>\$InNameAxisX</i>	name of x axis
string	<i>\$InTypeAxisX</i>	type of x axis
string	<i>\$InNameAxisY</i>	name of y axis
string	<i>\$InTypeAxisY</i>	type of y axis
string	<i>\$InChartType</i>	chart type

4.3.3 Field Documentation

4.3.3.1 `$AxisX`

`$AxisX`

Axis X

4.3.3.2 `$AxisY`

`$AxisY`

Axis Y

4.3.3.3 `$Id`

`$Id`

Id of the chart

4.3.3.4 `$InChartType`

`$InChartType`

Type of the chart

4.3.3.5 `$Name`

`$Name`

Name of the Chart

4.3.3.6 TYPE_CHART

```
const TYPE_CHART
```

Initial value:

```
= array(  
    "BAR_CHART" => "BarChart",  
    "PIE_CHART" => "PieChart",  
    "LINE_CHART" => "LineChart",  
    "BARH_CHART" => "BarChart"  
)
```

Contains all different types of chart

The documentation for this class was generated from the following file:

- [public/res/php/LChart.php](#)

4.4 LUser Class Reference

This class is a container for a user.

Public Member Functions

- [__construct](#) (\$InId=0, \$InUsername="")

Data Fields

- [\\$Id](#)
- [\\$Username](#)

4.4.1 Detailed Description

This class is a container for a user.

4.4.2 Constructor & Destructor Documentation

4.4.2.1 __construct()

```
__construct (  
    $InId = 0,  
    $InUsername = "" )
```

Constructor that create a user

Parameters

integer	<i>\$InId</i>	
string	<i>\$InUsername</i>	

4.4.3 Field Documentation

4.4.3.1 \$Id

`$Id`

Id of the user

4.4.3.2 \$Username

`$Username`

Username of the user

The documentation for this class was generated from the following file:

- [public/res/php/LUser.php](#)

4.5 LUserDB Class Reference

Class that makes query on DB for users.

Static Public Member Functions

- static [getUser](#) (`$id`)
- static [insertUser](#) (`$username`, `$password`)
- static [updatePassword](#) (`$id`, `$newPassword`)
- static [verifyPassword](#) (`$id`, `$oldPassword`)
- static [updateUser](#) (`$id`, `$newUsername`)

4.5.1 Detailed Description

Class that makes query on DB for users.

4.5.2 Member Function Documentation

4.5.2.1 getUser()

```
static getUser (
    $id ) [static]
```

Get a specific user thanks his id

Parameters

int	<i>\$id</i>	id of the user
-----	-------------	----------------

Returns

array if succeed or false if failure

Here is the call graph for this function:

**4.5.2.2 insertUser()**

```
static insertUser (
    $username,
    $password ) [static]
```

Insert a user in the database

Parameters

string	<i>\$username</i>	username of the user
string	<i>\$password</i>	password of the user

Returns

bool true if succeed, else false

Here is the call graph for this function:

4.5.2.3 updatePassword()

```
static updatePassword (
    $id,
    $newPassword ) [static]
```

Update the password from a user

Parameters

int	<i>\$id</i>	id of the user
string	<i>\$newPassword</i>	new password for the user

Returns

bool true if succeed, else false

Here is the call graph for this function:

4.5.2.4 updateUser()

```
static updateUser (
    $id,
    $newUsername ) [static]
```

Update the user

Parameters

int	<i>\$id</i>	id of the user
string	<i>\$newUsername</i>	new username for the user

Returns

bool true if succeed, else false

Here is the call graph for this function:

**4.5.2.5 verifyPassword()**

```
static verifyPassword (
    $id,
    $oldPassword ) [static]
```

Verify that the password is the same as before

Parameters

int	<i>\$id</i>	id of the user
string	<i>\$oldPassword</i>	old password of the user

Returns

bool true if the same password, else false

Here is the call graph for this function:

The documentation for this class was generated from the following file:

- [public/res/php/database/LUserDB.php](#)

Chapter 5

File Documentation

5.1 public/index.php File Reference

Main page.

Variables

- `$user = new LUser(3, "salut")`
